Precision Hot Air Station

Ref. TESE-A

Packing List

The following items should be included:

TESE Control Unit1 unit
 Ref. TESE-1A (100V / 120V)
 TESE-2A (230V)

Stand1 unit
 Ref. TE-SD

Heater hose set1 unit
 Ref. TE-TB (100V / 120V / 230 V)

Extractor desk1 unit
 Ref. 0008752*

Thermocouple type K1 unit
 Ref. PH218

* Not supplied with TE-Q stations

TE Accessory set
 Ref. 0010300

Extractors* Ref. E2184 E2064 E2052	Protectors* Ref. P2220 P2230 P2235 P4000 P4010
Tripods* Ref. T2050 T2250	Suction Tube* Ref. 0932330
Suction Cups* Ref. 0930110 Ø 10 - 0934050 (x3) Ø 4.7 - 0934070 (x1)	Nozzles Ref. TN9080 TN9208 TN9209

Power cable1 unit
 Ref. 0009417
 (100V / 120V)
 0009401 (230V)

Manual1 unit
 Ref. 0019043

Features

USB-A connector

Thermocouple type K

Activates the suction pump

Suction Tube
For tripods and extractors

Heater Hose set
Ref. TE-TB

Heating element

Hot Air button
(On / Off)

Stand
Ref. TE-SD

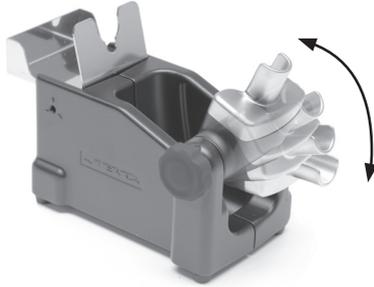

Auxiliar connector
Equipotential connector
USB connector
Robot RS232 connector
Power Socket
Fuse

P-005 Pedal connector

Adjustable Stand

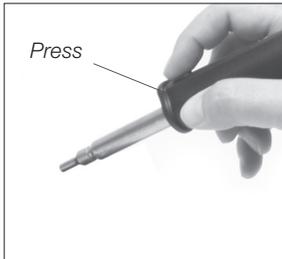

Adjust the tool holder angle to suit your work position.

Operation Modes

1. From the Tool Settings Menu, select the mode to activate the tool depending on the task.

Tool button

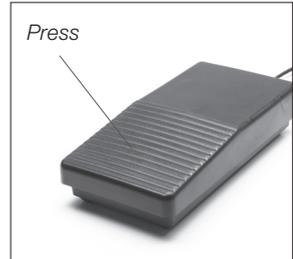

Press the start/stop button to blow hot air.

Autostart

The tool automatically starts blowing hot air when lifted from the stand.

Pedal*

Press the Pedal to blow hot air and release to stop.

*The **P-005** Pedal is not supplied with this station. See our website.

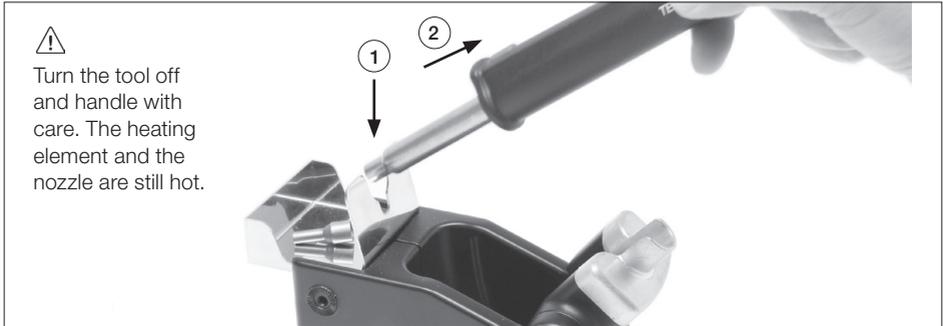

2. The tool stops blowing when pressing the start/stop button.

If the stand is connected to the station and for safety it will also stop when returned to the stand.

Quick Nozzle Changer

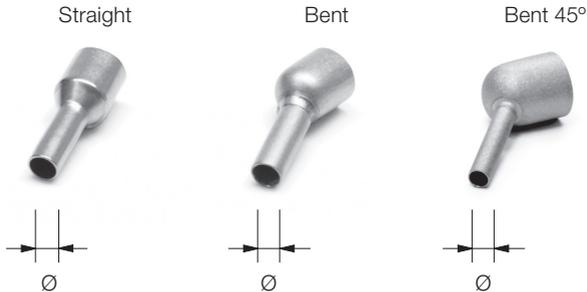

Changing nozzles quickly and safely.

Compatible Nozzles

The TE-TB Heater works with TN nozzles.

Find the model that best suits your soldering needs in www.jbctools.com

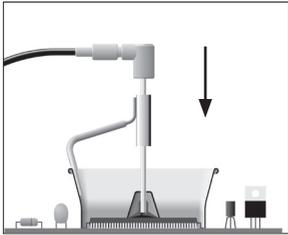

*	Ref.	Shape	Ø Size (mm)	Ø Size (in)
*	TN9209	Straight	3	0.12
*	TN9208	Straight	4	0.16
*	TN9080	Straight	5	0.20
	TN9787	Bent	3	0.12

*	Ref.	Shape	Ø Size (mm)	Ø Size (in)
	TN9785	Bent	4	0.16
	TN9782	Bent	5	0.20
	TN8851	Bent 45°	3	0.12
	TN8905	Bent 45°	4	0.16

* Included in TE Accessory set (Ref. 0010300)

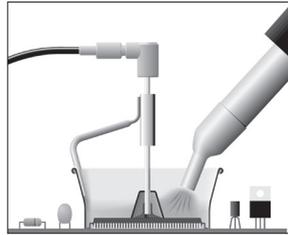

Operation

1. Placing

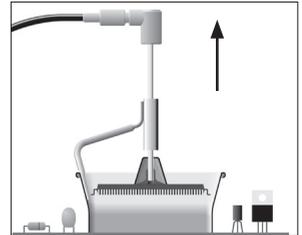

Position the extractor with the appropriate suction cup and press the suction button.

2. Heating

Heat the component.

3. Extracting

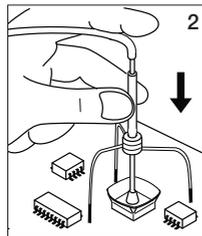

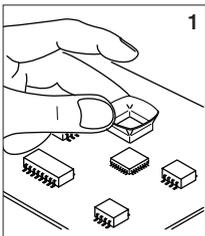

The component lifts off automatically when the solder melts.

Protectors & Extractors

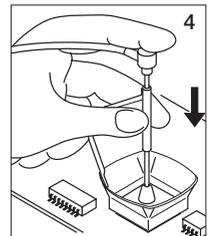

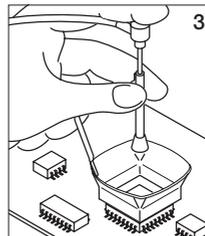

For small components (fig. 1 and 2).

We recommend using the protector + tripod

For large components (fig. 3 and 4).

We recommend using the manual extractors

Using the Thermocouple type K

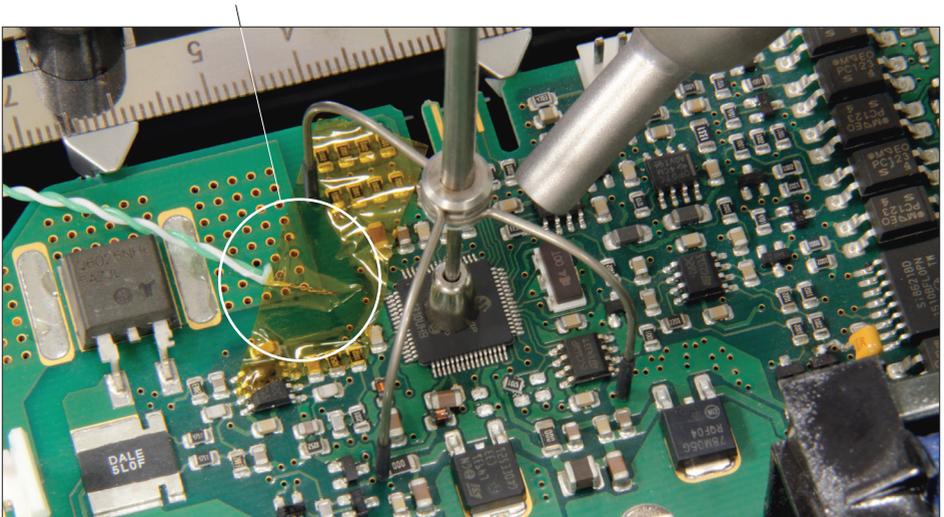

Connect a TC type K (PH218) to the station and use it as a protection or regulation sensor. You can define its use mode by means of the "Ext TC mode" option in the "Tool" menu.

You can choose from **two work modes**:

Regulation: the station regulates the air temperature automatically to maintain the External Thermocouple (TC) temperature.

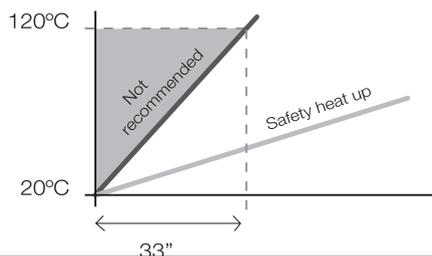

Protection: the station cuts the air supply off when the External Thermocouple (TC) temperature is reached.

Fix the TC with Kapton Tape (Ref. PH217) as near as possible to the component being worked on. If Kapton tape is not ESD you must use an ionizer.

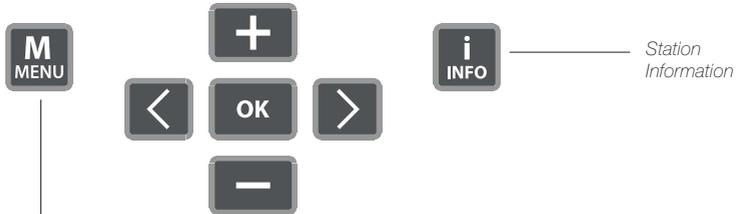

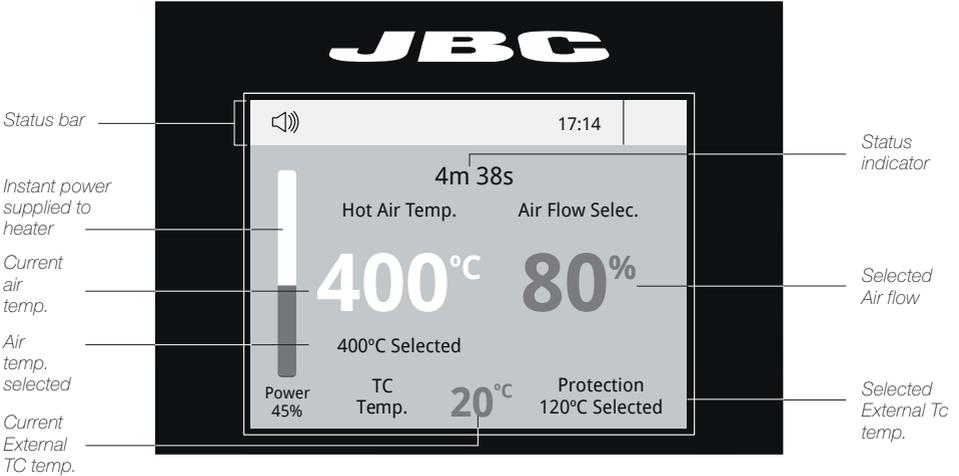

IPC* does not recommend exceeding ramp-up rates over 3-4°C / sec. (5-7°F / sec) so as to reduce the risk of thermal stress on the PCB.

* IPC was founded in the U.S. in 1957 as the Institute for Printed Circuits.

Process Control

The TESE offers an **intuitive user interface** which provides **quick access** to station parameters.
Original PIN: 0105

Menu Options

Press INFO for each parameter description.

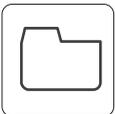

Station

Tools

Profiles

Files

Graphics

Reset

System notifications (Status Bar)

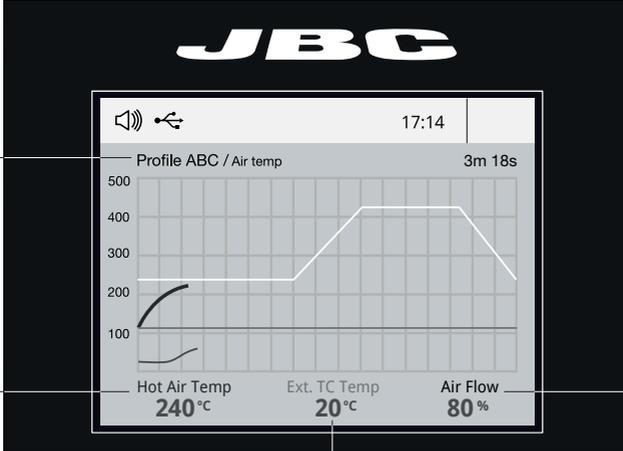

- USB flash drive is connected.
- Station is controlled by a PC.
- Station is controlled by a robot.
- Station software update. Press INFO to start the process.
- Warning. Press INFO for failure description.
- Error. Press INFO for failure description, the type of error and how to proceed.

Profiles

Profiles

In this mode you can **set up or edit** as many as 25 profiles of temperature and air flow.

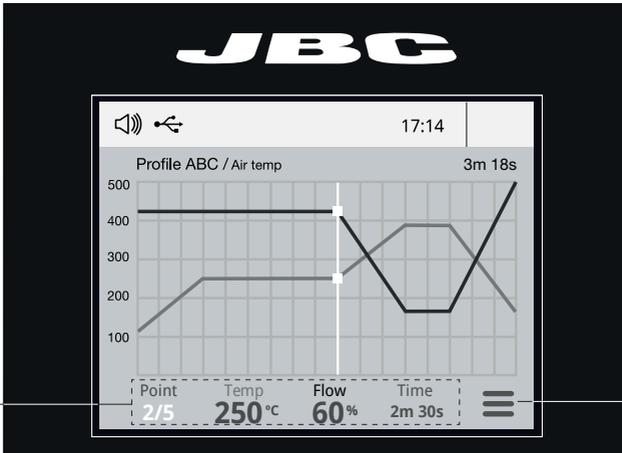

Profile name

Current air temp.

Current air flow

Current External TC temp.

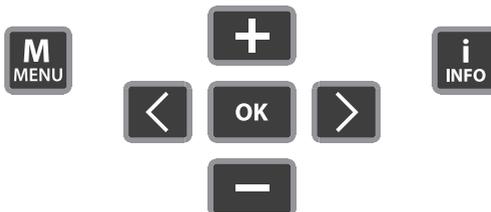

Edit Mode

Data for these points

Menu Options

- Add point
- Delete point
- Load profile
- Save profile
- Exit

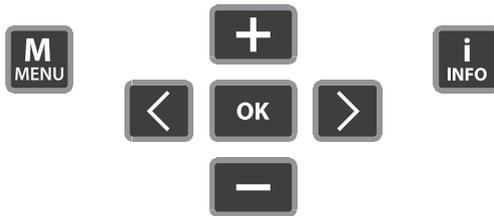

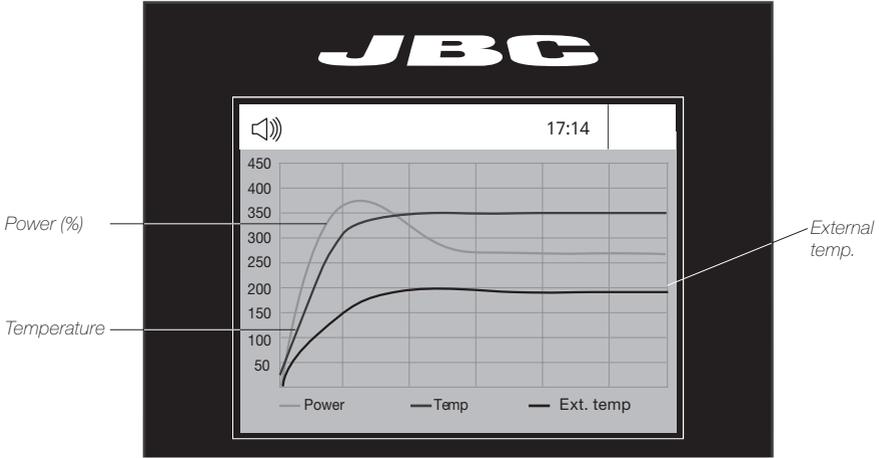

Process analysis

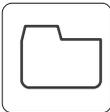

Graphics

By pressing **Graphics** in the main MENU, temperature and power figures in real time are displayed. This helps you decide which tip to use to obtain the best quality solder joints.

Files

Files

Export graphics

Insert a USB flash drive into the USB-A connector to save your soldering process in csv format.

Export / Import profiles

Insert a USB flash drive into the USB-A connector to export / import profiles.

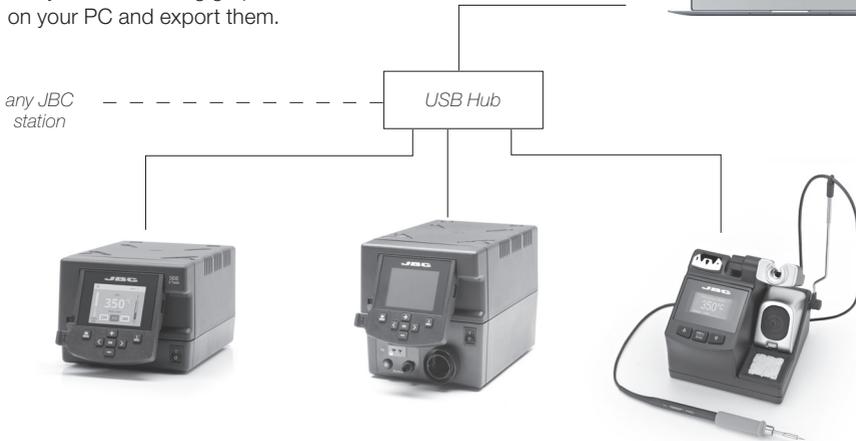

Soldering Net (Soon available)

Remotely manage and monitor your stations.

1. Download the **JBC Manager software** and the user manual from www.jbctools.com/manager.html
2. Connect the stations via USB-B connector and the PC will automatically detect them.
3. The notification  will be displayed on the station.

Functions:

- Set all the station parameters from your PC.
- Organize groups of stations and set all their parameters at the same time.
- Store specific configurations for later use.
- Analyze the soldering graphics of the stations on your PC and export them.

Update the station software

1. Download the JBC Update File from www.jbctools.com/software.html and save it on a USB flash drive. (Preferably one with no other files).

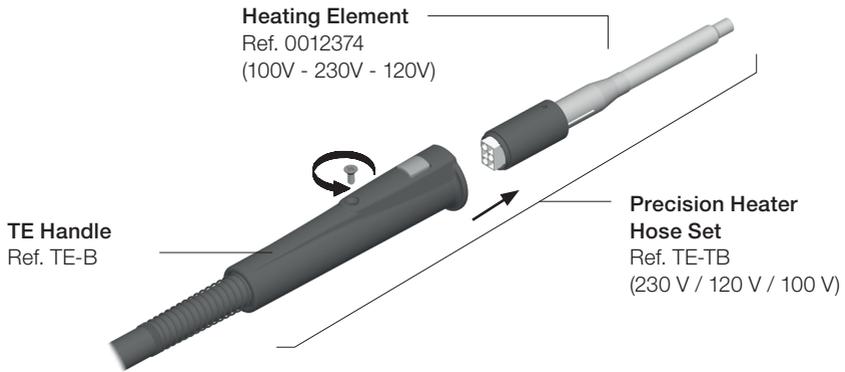

2. Insert the USB flash drive to the station. The icon  is displayed while updating.

Replacing the Heating Element

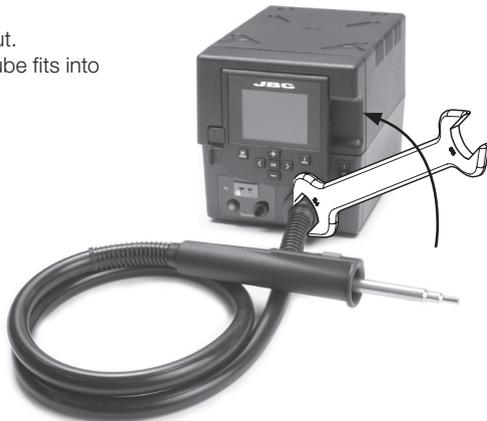

Only perform this operation when the element is cold and the unit is disconnected from the mains.

1. Loosen the screw.
2. Pull the heating element out of the handle.
3. Connect the new heating element, ensuring it is pushed all the way in.
4. Tighten the screw.

Changing the TE-TB Heater Hose Set

1. Ensure that the tool is turned off.
2. Use a spanner to unscrew the nut.
3. Make sure that the new heater tube fits into the grooves in the socket.
4. Tighten the screw.

Pick & Place *(not supplied with TE)*

This tool helps you place and remove SMDs of any size easily thanks to the suction pump.

Pick & Place
Ref. T260-A

Bent Needles Set
Ref. 0861660

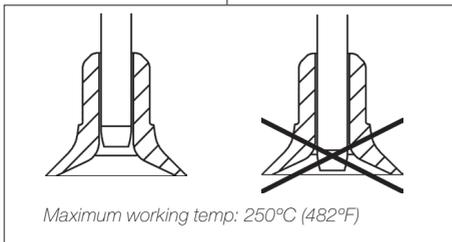

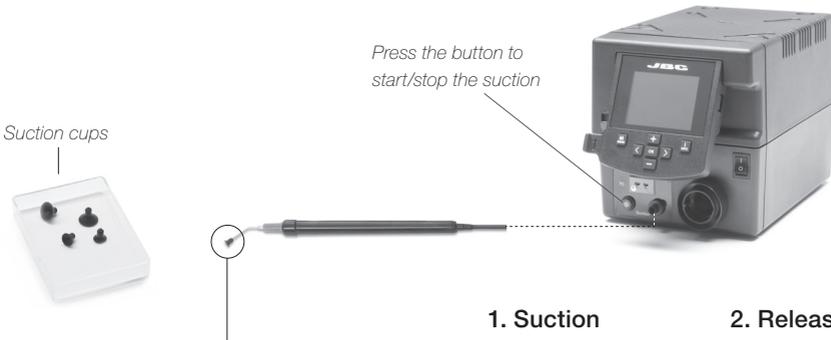

Straight Needles Set
Ref. 0901546

Operation

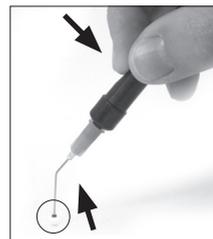

Choose the needle and the suction cup that best fits the component and start as follows:

Insert the needle with the appropriate cup for a correct suction process.

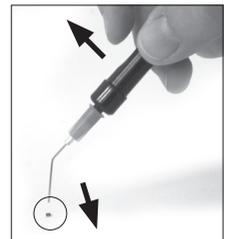

Make sure the needle does not protrude from the cup.

1. Suction

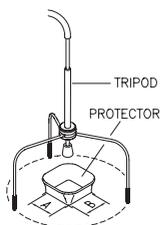

Once the suction is activated, cover the pen hole with your finger and lift off the component.

2. Release

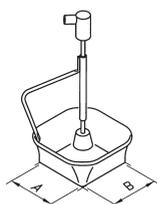

Lift your finger to release the component.

Maintenance

Before carrying out maintenance, always allow the equipment to cool.

- Clean the station screen with a glass cleaner or a damp cloth.
- Use a damp cloth to clean the casing and the tool. Alcohol can only be used to clean the metal parts.
- Periodically check that the metal parts of the tool and stand are clean so that the station can detect the tool status.
- Periodically check all cables and tubes.

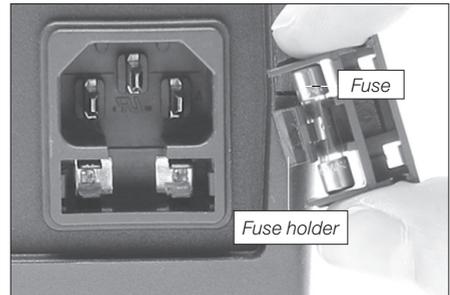

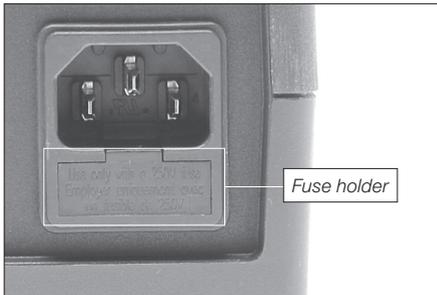

Clean periodically

- Replace a blown fuse as follows:

1. Pull off the fuse holder and remove the fuse. If necessary use a tool to lever it off.

2. Insert the new fuse into the fuse holder and return it to the station.

- Replace any defective or damaged pieces. Use original JBC spare parts only.
- Repairs should only be performed by a JBC authorized technical service.

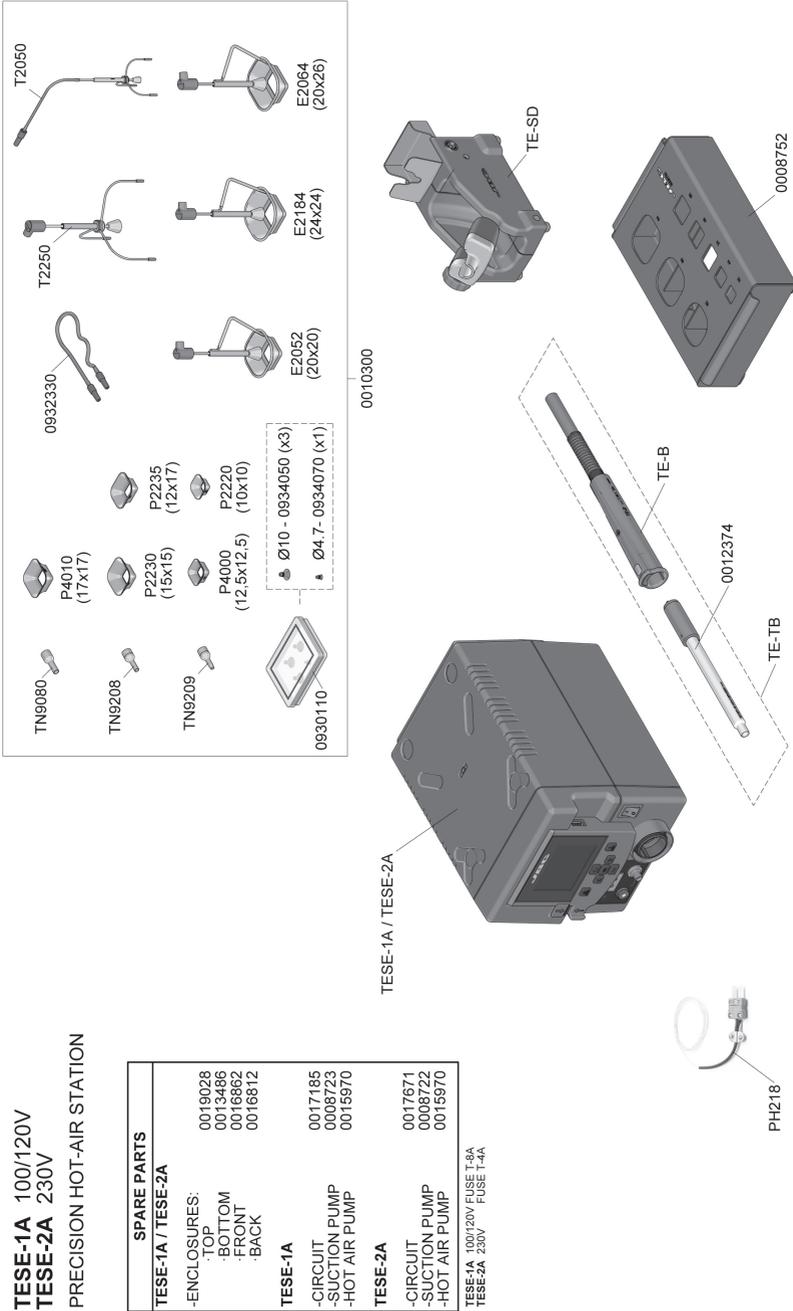

Safety

It is imperative to follow safety guidelines to prevent electric shock, injury, fire or explosion.

- Do not use the units for any purpose other than soldering or rework. Incorrect use may cause fire.
- The power cord must be plugged into approved bases. Make sure that it is properly grounded before use. When unplugging it, hold the plug, not the wire.
- Do not work on electrically live parts.
- The tool should be placed in the stand when not in use to turn off the hot air. The soldering tip, the metal part of the tool and the stand may still be hot even when the station is turned off. Handle with care, including when adjusting the stand position.
- Do not leave the appliance unattended when it is on.
- Do not cover the ventilation grills. Heat can cause inflammable products to ignite.
- Avoid the contact of flux with skin or eyes to prevent irritation
- Be careful with the fumes produced when soldering.
- Keep your workplace clean and tidy. Wear appropriate protection glasses and gloves when working to avoid personal harm.
- Utmost care must be taken with liquid tin waste which can cause burns.
- This appliance can be used by children over the age of eight and also persons with reduced physical, sensory or mental capabilities or lack of experience provided that they have been given adequate supervision or instruction concerning use of the appliance and understand the hazards involved. Children must not play with the appliance.
- Maintenance must not be carried out by children unless supervised.

Specifications

TESE-1A 100V - 120V 50/60Hz. Input fuse: 8A. Rated current: 7A

TESE-2A 230V 50/60Hz. Input fuse: 4A. Rated current: 3A

- Weight: 4.722 kg (10.41 lb)
- Dimensions (control unit): 148 x 184 x 140 mm (5.83 x 7.24 x 5.51 in)
- Nominal power: 300W
- Temperature selection: Room temp. / 150 - 450 °C (300 - 840 °F)
- Cool mode: T off. Used to blow air to room temperature
- Ambient operating temp: 10 - 40 °C (50 - 104 °F)
- Air flow regulation: 3 - 17 SLPM
- Vacuum: 30% / 228 mmHg / 9 inHg
- Connectors: USB station-PC
Robot RS232
P-005 Pedal

Complies with CE standards
ESD protected housing "skin effect"

JBC

Warranty

JBC's 2 year warranty covers this equipment against all manufacturing defects, including the replacement of defective parts and labour.

Warranty does not cover product wear or misuse.

In order for the warranty to be valid, equipment must be returned, postage paid, to the dealer where it was purchased.

This product should not be thrown in the garbage.

In accordance with the European directive 2002/96/EC, electronic equipment at the end of their life must be collected and returned to an authorized recycling facility.
